

Turn documents into defensible decisions.

DOCex reads the policies, payments, and applications your team already drowns in — and returns cited, audit-ready answers. Not a chatbot. A repeatable system of record for document-heavy review.

THE PROBLEM

Grants, finance, procurement and compliance teams read every file by hand to answer the same questions and check the same rules. It is slow, inconsistent between reviewers, and leaves no trail. When a donor or auditor asks “why was this approved?” the answer lives in someone’s inbox.

SIX CAPABILITIES, ONE PLATFORM

Compliance & approvals

Turn a policy into a reusable rulebook. Check any payment, get a per-rule verdict — pass, flag, or block — cited from both sides.

Document extraction

Ask plain-language questions across a stack of documents. Every answer cites the source file, exact quote, page, and confidence.

Reusable templates

Save the questions and policy sets your team runs every cycle, and apply them identically across hundreds of documents.

Attendance & payment

Match an attendance log to a payment list, apply per-diem rates, and verify every bank account before finance sees it.

Knowledge Q&A

Ask your library of reports and decks a question and get an answer with citations pointing to the exact slide or page.

Bank verification

Confirm a recipient’s name matches the bank-of-record account holder before any money moves — one account or a whole schedule.

WHY IT HOLDS UP

Cited, not just confident

Every answer and verdict points back to the source. Nothing to take on faith.

Repeatable, not one-off

A saved rulebook runs the same way on document 1 and document 200.

Defensible by design

Every check, escalation and sign-off is timestamped and frozen for audit.

PROVEN ON THE HARDEST CASE

TA Connect, a public-health NGO in Abuja, screens 200+ partner applications a cycle — 5–8 documents each, ~15 standard questions. DOCex collapses weeks of manual review into an afternoon.

Run a pilot on your own documents.

Pilots are scoped per team. Bring one cycle of real documents and we will stand DOCex up against them.
